The Future of Ventilation

FRONT ELEVATION

SECTIONAL
ELEVATION

Austral Monsoon Easiflow Operable Louvre is a modular, metal-framed ventilation system designed for projects requiring **adjustable airflow and light control, and architectural flexibility**, featuring smooth operation via galvanised steel link bars and UV-resistant components.

Characteristics

- Operable metal sheeting louvre system
- Compatible with automation and weather sensors
- Frame Depth: 100mm or 180mm
- Blade Height: 180mm
- Maximum span: 1500mm
- Free Open Area:
 - 35% (100mm Frame Width with 45° Opening)
 - 67% (180mm Frame Width with 85° Opening)

Applications

- Ideal for projects requiring adjustable airflow and light control, and architectural flexibility, including:
 - Factories and warehouses
 - Schools and education facilities
 - Swimming complexes
 - Multi-purpose halls etc.

Customisation Options

- Material
 - Aluminium/ Zinalume steel/ Colorbond steel/ Stainless steel
- Operation Methods:
 - Manual Lever or Winder
 - Electric Actuator
- Finishing Options:

Dependent on base sheet metal, generally supplied in:

 - Powder Coated
 - Natural Anodised
 - Other special finishes available upon request
- Internal mesh options available

Performance

- Engineer Certified AS/NZS 1170; AS/NZS 1664; AS 4055; AS 4100; AS 2047
